

- 37) a)  $-10 \text{ m/s}$   
 b)  $-20 \text{ m/s}$   
 c)  $\neq$

39)  $v_z = (t^2 - 7t + 10)$      $0 = t^2 - 7t + 10$   
 a)  $5s, 2s$      $\frac{10}{-5 \pm 7}$   
 b)  $a(5) = 3 \text{ m/s}^2$   
      $a(2) = -3 \text{ m/s}^2$      $0 = (t-5)(t-2)$   
      $a(t) = 2t - 7$

42) a)  $1s$      $0 = 2 \sin(\pi t)$      $a(t) = 2 \cos(\pi t)$   
 b)  $-2 \text{ m/s}^2$      $\pi t = \pi$      $\pi t = 0$   
      $t = 1$      $t = 0$

- 47) a) yes because it constantly increases by  $2.3 \text{ m/s}$   
 b)  $34.783s$

$v(t) = 2.3t$     c) No

~~$80 = 2.3t$~~

$80 = 2.3t$

$t = 34.78$

$x(t) = 1.15t^2$

$x(34.783) = 1.15(34.783)^2$

$= 1391.336 \text{ m} = 0.86 \text{ miles} \cdot 2 = 2.58 \text{ miles}$
